DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract exceeds the "150-words" limit. Correction is required. See MPEP § 608.01(b).

Drawings

3. Figures 8A, 8B, 9, 10A, 10B, 11A and 11B should be designated by a legend such as -- Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1-16 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Art Unit: 2851

The prior art does not teach a distortion measurement method and/or apparatus that forms $M \times m \times N \times n$ overly marks on a substrate, wherein $M > m$ and $N > n$; measures the positional difference (or misalignment) for the transferred marks which correspond to each other; and calculates a distortion amount based on the misalignment amounts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Nishi, et al. (US 4,780,616), Suwa, et al. (US 4,908,656), and Lin, et al. (US 4,585,342) each disclose an apparatus and/or method of measuring distortion in the projection optical system of an exposure apparatus.

7. This application is in condition for allowance except for the following formal matters:

The objections to the Specification (i.e., abstract) and the Drawings noted above must be corrected.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
